Gain Improved Visibility and Control Over Spend *(continued)*

Statement of Work (SOW)

Improperly sourcing and managing complex services spend engagements poses significant risk to organizations due to poorly defined scope, improperly classified resources, lack of milestone spend visibility and inability to monitor a 'fair award' practice.

Consol, ProcureStaff Technologies' VMS offering, delivers a proven solution combining technology, expertise and business intelligence to provide:

FULL WORKFLOW AUTOMATION

- Approval – sourcing, award, purchase order
- Approved supplier compliance management
- Bid control (competitive, single/sole source justification, etc.)
- Manage pricing by milestone
- Manage project deliverables against timelines
- Negotiate payment by deliverable
- View time and material components of each deliverable
- Monitor audit trails demonstrating 'fair practice award'
- Track supplier quality with configurable online surveys

CONFIGURABLE COLLABORATIVE ENVIRONMENT

- Role-based services spend management functionality
- Pre-populated templates for requests
- Distribute award across multiple suppliers
- Multiple currency capability
- Easily configurable RFP content to accommodate custom project requirements
- Manager or supplier specified deliverables, materials and resources

MAXIMUM VISIBILITY & ACCOUNTABILITY

- Consistent response format allows for line by line comparisons
- Negotiate with one or more suppliers online
- Track costs throughout the project life cycle
- Track key milestones and events associated with the project
- Access Project Portfolio to manage all the projects in your organization on a real-time basis Ensure process compliance with procurement criteria, i.e. scope change
- Robust real-time standard and ad-hoc reporting tools (spend, scope change, PO threshold, etc.)
